Grade Distribution for CMP/CCEN 480

Background:

Change from previous years' grade distribution is to:

1. Empathize the value of the problem definition
This will be achieved through:
 - Comparing with Competing Products:
This will clearly show size of the intended delivery
 - The Visibility Study, the Cash Flow and the Return on Investment
This will clearly show if they are working on a viable product or not.
2. Avoid tendencies that the project is a collection of ready-made library modules with minum development efforts.
This will be achived through:
 - Inroducing an appendix where students clearly indicate which modules wre developed and which are ready from library (of course needless to mention that hardware development is welcomed).

Grade Distribution:

- CMP 480 over both semseters (200 Points)
10% Seminar distribute as follows
 5% Problem Definition
 5% Comparative Market Study
 This will be a good milestone where students can reassess and change their road
25% Supervisor Assessment (incudes quality of deliverables)
10% Visibilty Study
20% Document and Development Effort (10% each)
10% Innovation and Rank among others
25% External Committee
- CCEN 480/481 over both semesters
Seminar pass/fail
 Assessment of both of the following:
 Problem Definition and
 Comaprative Market Study
 (Grade to be part of visibility study below)
25% Supervisor Assessment (includes quality of deliverables)
20% Visibilty Study (10% from seminar above)
20% Document & development (10% each)
10% innovation and Rank among others
25% External Committee
